# ProN8ure<sup>®</sup>

## MULTI-STRAIN PROBIOTIC

CONTAINS BILLIONS OF NATURALLY OCCURRING & BENEFICIAL LIVE BACTERIA, ESSENTIAL FOR INTESTINAL GOOD HEALTH

The digestive system plays a vital role in the health, vigour and performance of horses. Its correct functioning is dependent on the level and balance of bacteria and yeasts called microflora. Microflora have the major role in breaking down indigestible nutrients, in the synthesis and absorption of vitamins and minerals, in stimulating the immune system and in preventing the proliferation of pathogens in the gut. **Foals** are born with a sterile gut which is rapidly colonised by both beneficial and pathogenic bacteria. A fine balance exists which can easily be disrupted, leading to scouring, ill thrift and other problems. Feeding ProN8ure from birth protects the foal from pathogens, improves digestive efficiency, enables better utilisation of feed and makes the transition from milk to solid feed easier. **Broodmares** fed ProN8ure withstand the stress of foaling better and are more likely to produce healthier, more viable foals. ProN8ure also encourages a more plentiful supply of colostrum and increases the quantity and quality of milk available to the newborn foal.

**All horses** benefit from ProN8ure's ability to stabilise intestinal microflora, maximise gut health and resist the effects of stress.

Stress, in all forms is one of the major causes of disruption to the normal balance of microflora in the gut, allowing proliferation of pathogens. Loss of appetite, picky eating, scouring, poor condition and changes in temperament are some of the less severe consequences. Stress is easily induced with some common causes being: changes in diet, heavy work or training, temperature extremes, breeding, transportation, worming, vaccinations and changes to environment. Use of ProN8ure in these circumstances protects horses from negative intestinal changes while improving digestive efficiency and general health.

Antibiotics are particularly harmful to gut microflora, leaving horses susceptible to re-infection. ProN8ure should always be administered following any course of antibiotics.

*Available in a complete range of sizes for Powder, Liquid, Paste and Soluble.*

### 10 BENEFITS OF PRON8URE

- Establishment of beneficial gut microflora
- Suppression of *E.Coli*, *Salmonella* & *Aeromonas* spp
- Treatment and control of scouring and diarrhoea
- Improved digestibility of feed
- Improved growth and feed conversion
- Reduced digestive upsets
- Enhanced animal health
- Re-establishment of gut microflora following antibiotics, wormers or vaccination
- Reducing stress (stress disrupts normal intestinal balance)
- Safe, non-toxic and residue-free.

# Vitam<sup>®</sup> Health & Vitality<sup>™</sup>

Dustless\*<sup>®</sup>

## THE ULTIMATE SOURCE OF ESSENTIAL NUTRIENTS FOR THE HIGH PERFORMANCE HORSE

To maintain good health, vigour, growth and performance, a daily intake of necessary nutrients is essential.

**Vitam Health & Vitality gives your horse what feeds lack.** Feed ingredients can't be relied upon to consistently supply essential nutrients in the right amounts and balance as nutrient content can vary widely, depending on growing and storage conditions. Horses in training have increased needs, yet it is impossible to select feeds to supply higher levels of specific vitamins and minerals.

**With 21 essential trace elements** including biotin, b-group vitamins and choline, Vitam Health & Vitality ensures the needs of the high performance horse are being met.

**A sound nutritional program** will also include Calciplex Bone & Joint and Electromix Electrolytes & Sweat.

*Available in 3kg and 20kg.*

# Vitam<sup>®</sup> Plus Health & Vitality<sup>™</sup>

Dustless\*<sup>®</sup>

## THE ESSENTIAL NUTRIENTS OF VITAM WITH PRON8URE MULTI-STRAIN PROBIOTIC

This unique product combines a vitamin mineral supplement with a probiotic to address the needs of the whole horse - formulated to support the performance of young growing horses, those stressed by training and competition and stud breeding mares and stallions.

A low dose rate and high nutrient value together with ProN8ure's 7 strains of safe, live, natural bacteria, benefits general well being and improves intestinal microbial balance - for better digestion of feed, reduced upsets, maintenance of appetite and suppression of *E. coli*, *Salmonella* and *Aeromonas* spp bacteria. ProN8ure restores the gut to good health allowing horses to perform at their best.

*Available in 4kg and 10kg.*

# Min·A·Vit<sup>®</sup> Racing & Breeding<sup>™</sup>

Dustless\*

## THE SINGLE SOURCE MINERAL & VITAMIN SUPPLEMENT WITH CALCIUM & CHROMIUM

A true foundation supplement designed to meet all of the important mineral and vitamin needs of horses, regardless of breed or performance activity.

With significant levels of necessary macro (calcium, phosphorus) and micro minerals like zinc and copper, no additional supplements are required.

The recent addition of Chromium provides additional benefits - aiding in conversion of fat to lean muscle mass and helping retard build up of lactic acid in the blood and risks of tying-up.

The easy way to balance rations. The complex nutrient base of Min·A·Vit Racing & Breeding has proven to be ideal in meeting the needs of all horses, whether for performance or breeding and growing.

However, for treatment of particular conditions or for horse owners who prefer to feed horses as individuals, additional supplements may be safely added.

### For better condition and everyday good health.

Min·A·Vit Racing & Breeding is one of the best value - for-dollar supplements now available. A well proven formula, it has been an industry selected product for more than twenty years.

Available in 4kg and 20kg.

# Calciplex<sup>®</sup> Bone & Joint<sup>™</sup> Plus<sup>™</sup>

Dustless\*

# Calciplex<sup>®</sup> Bone & Joint<sup>™</sup>

Dustless\*

## THE PALATABLE CALCIUM & PHOSPHORUS SUPPLEMENT FOR STRONG BONES & HEALTHY JOINTS.

Calciplex Bone & Joint combines 2 forms of calcium with phosphorus, magnesium, vitamins A, D, and trace minerals for uptake, regulation and balance of these vital bone and joint cartilage components.

Bone development, maintenance of skeletal strength and the 'bone bank' of stored calcium relies on adequate intake of calcium, phosphorus and magnesium as does optimum muscle function and the increased needs of mares during late pregnancy and lactation. The health, natural flexibility and resilience of joint cartilage to wear and tear is maintained by intake of the vitamin A, copper, manganese and zinc, whilst the vitamin D aids in utilisation of macro minerals.

### CALCIPLEX BONE & JOINT PLUS

The essential nutrients of Calciplex with increased phosphorus, added vitamin C and Glucosamine, for the next step in improving care of bone and joint.

Available in 3kg and 15kg.

### FOR MORE SPORT IN YOUR HORSE, ORAL REHYDRATION PUTS BACK WHAT SWEAT TAKES OUT

During strenuous exercise, horses lose large amounts of electrolytes in sweat. If not replaced quickly, fluid balance may be disrupted, horses can dehydrate and muscle damage is likely. Horsport Rehydration & Recovery rapidly replaces the nutrients needed by exercising horses so they can recover faster, 'back-up' sooner and maintain peak performance for longer.

Horsport Rehydration & Recovery contains electrolytes to prevent dehydration and to replace losses in sweat, glucose to replace energy used by cells, and glycine to help these be easily absorbed.

**Use during or after heavy sweat loss.** Horses involved in events such as racing, show-jumping, polo and polocrosse should receive Horsport Rehydration & Recovery as soon as possible after competition or intense training sessions. With endurance riding, 3 day eventing or long distance transportation, Horsport Rehydration & Recovery may also be administered along the way to replenish body reserves and prevent dehydration later on.

(For best results use Electromix Electrolytes & Sweat every day for electrolyte requirements and Horsport Rehydration & Recovery whenever sweating occurs, to rapidly replace lost nutrients.

*Available in 1L and 5L.*

### EVERYDAY ELECTROLYTE SUPPLEMENT ENSURES THEY'RE READY FOR TRAINING & HEAVY WORK

All horses lose body salts in sweat, particularly when engaged in hard work. Those receiving ongoing training for performance events or racing need the special care of daily electrolyte replacement to *maintain body fluid balance and prevent dehydration*. Regular administration, prior to sweating, makes sure muscles can perform at optimum levels.

**Horses need more than just one salt.** Electromix Electrolytes & Sweat is *bicarbonate free* but contains a balanced mix of sodium, potassium, sulphate and chloride ions. All of these salts are lost in sweat and when provided in correct ratios can improve stamina, leading to better performances.

**For light and heavy sweaters** simply vary the dose, there's no guesswork as optimum results at various dosage levels have already been determined. Electromix Electrolytes & Sweat mixes easily into feed or water or can be used as a pre or post race drench.

*Available in 2.5kg, 5kg and 20kg.*

# Horsport Rehydration & Recovery

# Electromix Electrolytes & Sweat

# Neutra-Syrup Neutralises & Removes

**NEUTRALISES THE PAIN OF ACID BUILD UP & RESTORES COMFORT TO ACHING MUSCLES**

Horses undergoing training or hard work naturally generate lactic acid in their muscles. The horse has natural buffering systems to cope with this acid but sometimes these can be overloaded. Acid build-up then causes fatigue, pain, stiffness in the hindquarters and 'tying up'. Neutra-Syrup Neutralises & Removes given in feed works quickly to neutralise body acid and restore comfort to aching muscles.

**Choose between treatment or prevention.** Some horses have less natural buffering ability than others and are more prone to showing the effects of acid build up. These horses should receive daily administration as an effective preventative. Other horses may only require administration on a treatment basis.

**Keep their systems clean.** Neutra-Syrup Neutralises & Removes is a mild diuretic which helps flush the system of waste products, restores alkaline conditions and reduces the chance of bacterial infections.

**A palatable flavour.** Special sweeteners and additives in Neutra-Syrup Neutralises & Removes make it easy to administer by syringe or in-feed and can lead to appetite improvement.

*Available in 1L; 5L and 25L.*

## HORSEMEN KNOW THE SIGNS WHEN AN EFFECTIVE DIURETIC & KIDNEY ANTISEPTIC IS REQUIRED

Used by professional horsemen in Australia for more than half a century, signs like thick, cloudy, smelly urine or puffy hind legs mean it's time to bring out KA Cleans & Flushes. Horsemen also know that like any filter, kidneys function better when clean.

**Flushes out harmful toxins from the kidneys.** A reliable diuretic action removes toxins from the body by stimulating thirst and increasing the volume of urine passed. The gentle antiseptic action helps clean and protect the kidneys and urinary tract from infection.

A proven product that does not swab, KA Cleans & Flushes is a palatable mixture suitable for addition to the feeds of racehorses, endurance horses, all classes of competition horses and as a means of reducing fluid build-up in mares heavy in foal.

*Available in 500g; 3kg; 10kg.*

# KA Cleans & Flushes™

# Ironvita Blood & Oxygen™

## REPLACES IRON, RESTORES THE BLOOD

**Don't let iron deficiency restrict performance.** Racing, endurance and polo are a few high performance activities where the stress of heavy training and competition causes rapid breakdown of red blood cells. In severe cases, iron deficiency anaemia can result. Tell-tale signs of impending trouble include listlessness, a picky appetite and the loss of a horse's 'will to win'.

Blood cells play a critical role in transporting oxygen to hard working muscles, so to maintain performance it's important to maintain blood cell 'health'.

As well as performance horses, Ironvita Blood & Oxygen should be given to young, growing horses to support the daily production of new blood cells and following injuries involving blood loss. Ironvita Blood & Oxygen for broodmares, towards the end of pregnancy, helps build the blood of strong healthy foals.

**An iron supplement, plus...** Ironvita Blood & Oxygen includes additional ingredients selected to enhance the benefits of iron. Copper helps horses mobilise iron from storage areas around the body while cobalt helps synthesise vitamin B12 which horses require to recover from anaemia. Ironvita Blood & Oxygen also contains folic acid which has been shown to increase haemoglobin concentrations, often deficient when green pick is limited.

Available in 1L; 5L and 25L.

## ESSENTIAL VITAMIN E PROTECTION FOR MUSCLES

**All Vitamin E products are not the same!** The vitamin E in Snow-E Muscle Energy & Fertility was selected for both effectiveness and stability to ensure your horse receives all it should, everytime. Other 'natural' sources of Vitamin E can be unstable and lose potency if exposed to oxygen, minerals or limestone.

Free radicals, released in muscle cells during exercise, can reduce muscle strength and increase recovery time. High levels of vitamin E provide protection to muscle cells in horses prone to 'tying up'.

Horses in sports like endurance need high oil diets for greater energy. This creates an even greater need for a reliable vitamin E product to help prevent oxidation of oil in feed and improve protection.

Snow-E Muscle Energy & Fertility assists in other ways, like stimulating immunity and improving ability to utilise vitamin A. It is also recommended as an aid to increasing fertility in stallions and conception rates in mares and may be administered 'in feed' or by oral syringe.

Available in 700g; 1.5kg; 7kg.

# Snow-E Muscle Energy & Fertility™

# Bio-Hoof<sup>®</sup> Care & Repair<sup>™</sup>

Dustless\*

**WE ALL KNOW - NO HOOF, NO HORSE, SO GET THEIR HOOVES INTO GREAT SHAPE**

Biotin, more than any other nutrient affects the growth and strength of hoof walls and soles. Feeding biotin at levels well above those found in feedstuffs improves the quality of hoof growth. Bio-Hoof Care & Repair is recommended for horses suffering from split, shelly or cracked hooves.

**There's more to hooves than just biotin.** Other nutrients needed to build hooves include zinc, sulphur and calcium. Bio-Hoof Care & Repair includes these trace elements to ensure the biotin can be used to its greatest advantage. Ideally a protein supplement such as Livamol or Manomix should be fed concurrently for adequate protein to build hoof wall keratin.

**Hooves take time to grow.** It takes time for new, stronger horn to be produced and appear as hoof. Treatment for 3-6 months allows time for new growth to move down the hoof.

*Available in 600g and 1.2kg.*

## FOR NERVOY, STRESSED & IRRITABLE BEHAVIOUR IN HORSES

Sootha Nerves & Stress is the most advanced nutritional supplement available for treating stress and the underlying causes of nervy behaviour in horses and the only one to combine ProN8ure multi-strain probiotic with B Group vitamins, magnesium and tryptophan.

**Nervous symptoms** like excitability, muscular twitching, diarrhoea, muscle stiffness and other disorders have been linked, in scientific literature to deficiencies of B Group vitamins and magnesium.

**Mood stabilising** is addressed through tryptophan, long known as a mood stabiliser, particularly when used in conjunction with vitamin B6 and magnesium.

**Overcoming stress from digestive upsets** is the role of ProN8ure multi-strain probiotic. Sootha Nerves & Stress breaks new ground in treatment by ensuring the well-being of the digestive system. Whether disruption to the normal intestinal microbial balance is the cause of stress, or one of its symptoms - ProN8ure works efficiently to restore gastro-intestinal balance with natural, healthy, live bacteria.

*Available in 450g; 1.8kg and 4kg and special 30g syringe formulation.*

## Sootha Nerves & Stress<sup>™</sup>

**MANOMIX. A PROTEIN PELLET FOR MUSCLE GROWTH & YOUNG ANIMALS**

Manomix is a highly palatable and digestible 25% protein pellet combining quality protein sources like soybean meal, whey and yeast with added vitamins, minerals and fatty acids.

**From conception to maturity.** High energy levels make Manomix ideal for pregnant and lactating mares requiring protein to support foal growth and milk production. For weaning foals, palatability and sweet aroma encourages appetite and feed uptake. For young growing horses in training, Manomix is a safe energy source, providing protein high in methionine and lysine, essential amino acids for building and repairing tissue and muscle.

*Available in 20kg.*

**LIVAMOL® FEED OPTIMISER PELLETS FOR HORSES**

Scientifically formulated for Australian conditions and fortified with essential vitamins, minerals (including organic trace, macro & electrolyte), amino acids, omega 3 and 6 fatty acids for optimal growth and performance.

Also contains glucosamine, biotin and chromium yeast and much, much more.

**LIVAMOL® Feed Optimiser has been formulated:**

1. To make it easy for horse owners to make up their own feeds.
2. For use with Livamol, Australia's Leading Coat Conditioner.
3. To give horse owners flexibility to customise feeds, for individual horses when necessary.

*Available in 15kg.*

**LIVAMOL. AUSTRALIA'S LEADING COAT CONDITIONER FOR THE PAST 50 YEARS**

**See the difference within 14 days.** For yearling preparation, show or stud stock or whenever horses need to look their best, Livamol is the secret ingredient.

Livamol contains a proven formula of oils and oilseed meals, all selected for their ability to improve skin and coat condition. A new richness of colour and sheen in the coat is produced in 14 days or less, generally matched by a brighter, more alert attitude.

'Cool' energy and good health is a promise Livamol can easily fulfil. Prime protein meals, blended with dried molasses and (cool) energy sources have been balanced with trace minerals and essential vitamins to produce a concentrated and nutritious feed additive.

An ideal way to provide the energy and protein horses need without the fizziness of grains, Livamol is highly palatable, helps stimulate appetite and can be added to all feed rations.

Livamol keeps them looking good and feeling good.

*Available in 2kg, 10kg and 20kg.*

## FARNAM® LEATHER NEW™

Self-polishing cleanser, cleans, softens, and shines all leather like new.

Leather New combines the cleaning, oiling and polishing of leather into one easy process, removing dirt and grime and imparting a brilliant shine. Leather New won't stain jodhpurs, gloves or horses' coats.

Natural animal oils penetrate to restore condition and suppleness to saddles, bridles and other tack, boots, upholstery or any other leather item needing restoration.

Available in 500mL.

## THE 'PERFECT PARTNERS' GROOMING RANGE

Formulated especially to complement Australia's leading coat conditioning supplement for total coat care.

### LIVAMOL SUDS

A pH balanced foaming shampoo and conditioner that foams away dirt and dust easily while imparting that silky smooth feel you only get from an effective formulation - gentle on skin and rinses easily.

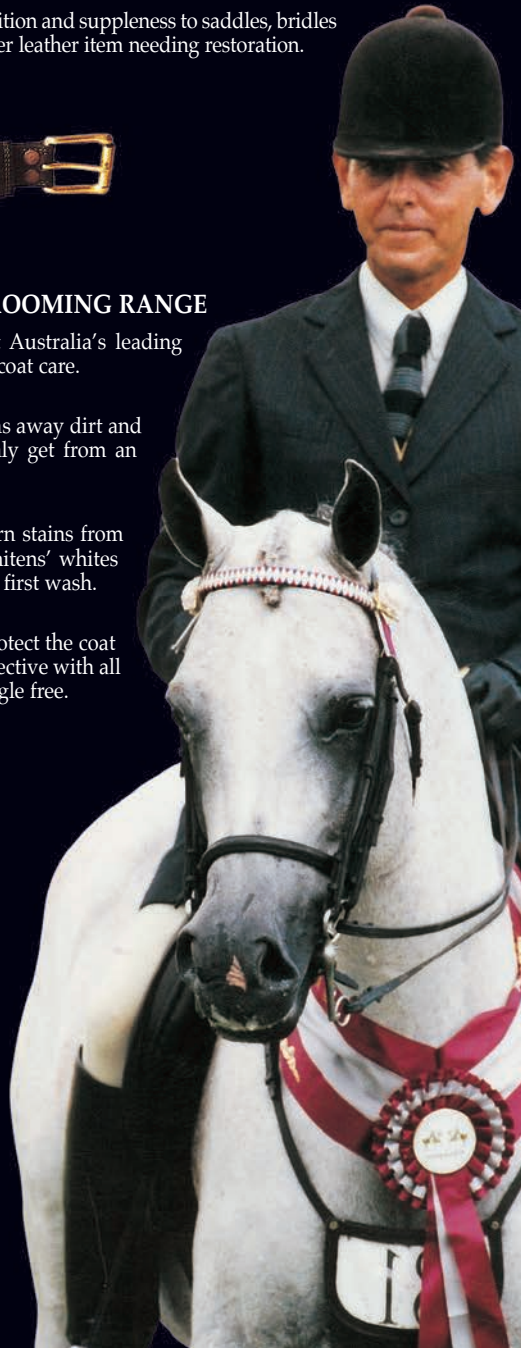

### LIVAMOL BLU

Colour brightener and whitener formulated to shift stubborn stains from coats, manes and tails. It brightens darker colours and 'whitens' whites and greys. Fast acting, it dries to a glistening finish after the first wash.

### LIVAMOL GLO

A show finish and the final touch to all grooming - helps protect the coat by repelling dirt and dust whilst adding a brilliant shine. Effective with all coat colours and keeps manes and tails manageable and tangle free.

In 'easy grip' 750mL size.

**FARNAM® BUFFERED IODINE****A NON-STINGING ANTIMICROBIAL SPRAY.**

The product of choice for treatment of bacterial and fungal infections in animals. It helps protect wounds, cuts and abrasions from infection and can be used for navel disinfection, ringworm, greasy heel, mud fever and rain scald. Excellent as a skin disinfectant prior to surgery or injections.

*Available in 500 ml.*

**FARNAM TITE LINIMENT****FOR BETTER TREATMENT OF LEG PROBLEMS.**

Active ingredients increase circulation and general blood flow to affected areas, accelerating repair and recovery of tissues, creating warmth and alleviating soreness in tendons, osselets, ringbone and splints. A humane, effective alternative to blistering or firing, Tite Liniment can also be used to stimulate blood flow to coronets to promote hoof growth. An effective treatment for shin soreness, the increased circulation from Tite Liniment can assist in the 'bone remodelling' important to 2-3 y.o. in training and for older horses subject to the stress of continuous racing.

*Available in 500ml.*

**FARNAM WOUND KLENSE****FOR TREATMENT & CLEANSING OF CUTS, WOUNDS, ULCERS & ABSCESSSES.**

Organic acids in Wound Klense assist in the cleaning and removal of debris and dying tissue (proud flesh) from wounds - helping in the regeneration of healthy tissue. Wound Klense contains a non-greasy additive, pre-prevents wounds from drying out and promotes more rapid healing.

*Available in 500ml.*

**FLINT'S MEDICATED OIL****ASSISTS IN HEALING CUTS, WOUNDS & GALLS.**

There's only one reason a product remains available for more than 100 years! Flint's Medicated Oil has been a trusted treatment since 1892. Safe, gentle and soothing to use on open wounds, repellant to flies, has a long lasting effect and heals from the inside out.

*Available in 200ml, 500ml, 1L.*

## CONCENTRATED MULTI-STRAIN PROBIOTIC WITH GARLIC EXTRACT.

This unique oral paste formulation was specifically created to aid in control of scours. It contains a synergistic combination of live micro organisms with a powerful, natural antimicrobial. These work in harmony in attacking disease causing bacteria responsible for scours, diarrhoea and other conditions, while having no effect on the performance of natural beneficial bacteria in the gut.

Garlic, used for thousands of years for its nutritional and medicinal properties has only recently been subject to manufacturing processes enabling stabilisation of its antimicrobial active. D-Scour is the effective, natural approach to treatment and protection.

*Available in 30g and 100g syringes*

## GLUTACIDE

### STABLE DISINFECTANT AND ALL PURPOSE CLEANER.

Glutacide is a strong disinfectant and detergent providing broad spectrum activity against bacteria (including spores), fungi, viruses, protozoa and yeasts. Glutacide kills rapidly but also remains active on treated surfaces for several days. Its cleaning action reduces ammonia odours which contribute to pneumonia and general ill health.

*Available in 1L, 5L and 25L.*

**FARNAM® MECWORMA® & TAPE**

**ALLWORMER PASTE FOR HORSES**

An excellent addition to any arsenal against horse worm attack to treat & control tapeworms while being an effective broad spectrum allwormer. Suitably camouflaged to attack tapeworms, a broad range of worms, plus bots and summer sores in horses of all ages whether growing, breeding or in training. Remember it by name, MecWorma & Tape Allwormer.

Available in 32.5g dial-a-dose syringes.  
20 per box.

50 syringes per pail

50 syringes per pail

**FARNAM MECWORMA & BOT**

**BROAD SPECTRUM WORM PASTE FOR HORSES**

An advanced worming paste that takes the war on worms into new levels of effectiveness. This real value, one-shot wormer weapon combats and controls all common internal worms. MecWorma & Bot's active ingredient increases the firepower against worms and bots whilst providing protection and treatment of summer sores.

The true easy-squeeze action takes the stress out of pasting, reducing wastage from misfires and finally provides horse carers with a paste that doesn't require a commando's grip.

Safe to use with all horses, including pregnant mares and foals.

Available in 33g dial-a-dose syringes.  
20 per box.

## FARNAM® WORMA DRENCH

### THE FLEXIBLE HIGH PERFORMANCE SOLUTION.

This wormer weapon is the answer to those horses that are difficult to drench or paste. Flexible in use, Worma Drench is a low cost 'pour-in' to feed worming system that can also be administered as a drench or via syringing into the mouth.

Effective against all common worms, the active ingredient works faster and lasts longer than other BZ (benzimidazole) drenches and has a wide safety margin.

For studs with large numbers of horses Worma Drench comes in a convenient backpack.

*Available in 250mL, 1L and 5L.*

## FARNAM WORMA PASTE

### THE BROAD SPECTRUM ROTATIONAL WORMER.

Worma Paste combines Oxfendazole and Piperazine, the two active ingredients typically used by veterinarians for stomach drenching horses. The ingredients selected due to effectiveness, the sterilising action against worm eggs (within 24 hours) and because there is no known worm resistance to the ingredient combination.

Controls all common worms including roundworm, pinworm, strongyles, small strongyles, adult stomach hair worm and stomach worm.

Safe for all ages and stages.

*Available in  
56g dial-a-dose syringes.  
15 per box*

*30 syringes per pail*
